

# NEW ALBANY, INDIANA

## Insulated Roofing Contractors

**F**ounded in 1974 when the spray foam roofing industry was just developing, we have grown by focusing on solving our customers' problems. Our innovative solutions to difficult projects have saved our clients valuable time and money. Further, our customer service stretches beyond the average work day; we have dedicated customer service personnel who are available 24 hours a day, a fact our clients truly appreciate.

We are a family-owned and operated roofing company who came from a humble beginning. We understand the unique struggles that face a small company. However, we have also worked on very large jobs (Miami Airport, Superdome) and have learned what these large companies and large jobs require. This makes us a valuable resource for very large customers as well. From our modest start, we have now become the largest spray foam roofing contractor in the country. While we offer other roofing solutions, spray foam is our core, it is what we do best, and so it remains our focus. As a result, our skills and capabilities with spray foam are unmatched in the roofing industry. ■
